About Us

IsoLeed® was founded in Montreal, Quebec in 2012 by Serge Meilleur and Andre Grenon, who introduced the first Polycrete® Insulated Concrete Form product, the FLEX 850 about three decades ago. Today, Mr. Meilleur and the *IsoLeed*® team have introduced a superior product, the Iso-Pro 1200 which has already hit the market!

in 2021 Tahar Titouah and his team with a solid 20 years of construction experience joined the ranks of ISOLEED to add their touch to the famous ISO-PRO 1200 panel.

The newly patented product is rapidly becoming an industry favorite

due to its easy installation, its versatility and its superior strength. The *isoLeed*® product line is proving itself to be products of excellence in more than eighteen countries through projects of all sizes and types.

No competitor in terms of fire resistance (incombustible). Unrivaled in R34 insulation. with record installation times.

Our Mission

To conceive and promote methods and solutions to facilitate the construction of all types of buildings by using insulating formworks for concrete and in respect of the environment while keeping a high level of quality of products, training and services.

Our Vision

By 2030, a major portion of the residential and commercial building market will be built from insulating formworks for concrete, replacing the conventional structures that will be costly and inefficient on an ecological and performance point of view.

“The secret of change is to focus all of your energy, not on fighting the old, but on building the new.”
